WAUSEON, OHIO, FRIDAY, FEBRUARY 20, 1914

An Interesting and Instructive Pro-plant three grains to the hill, har-row shortly after planting, and again Presented and Discussed Resolu-

The Farmer's Institue held last week in Wauseon was very good and the at-tendance was satisfactory. The state speakers were able men and presented their subjects in a masterly manner. President R. H. Fernold called the meeting to order promptly at 10 a. m. February 11.

Rev. James Wharton offered prayer "The Farmer's wife and her poul-y yard," was ably discussed by G. Scott. The following are some of points made. One can start in poult business with ver little Poultry meat is the best

wife should always have access to the poultry feed available.

Breeds are important. Kee- awfrom the Asiatiq Breeds. The old Brown Leghorn is the best forager and will stand a great amount of parking. Black fowls are good layers and must be fed a balanced ration. Eggs good stayers. Black Shangshangs are of good size and will stand lots of cold of good size and will stand lots of cold hens weigh from 6 to 7 lbs. Cock 8 to 21, pulets will lay at 5 months, and are 75 per cent water, keep plenty of clean tepid water, for hens eggs are 15 per cent Albumin and 10 per cent fat. Keep shell forming feed, Feed alfalfa hay, feed suculent feed, cabbage and roots. Have a rye patch close to the poultry yard, feed in winter a substitute for worms and bugs—meat scraps and ground bone, feed plenty of grit, build poultry home with shed roof 6 ft high in back and 8 ft. high in front.

Geo. Biddle urged the use of the tran nest to get rid of the hen that is the loafer It is not always the beautiful hens that produce the eggs, the egg production in the U. S. in 1912 was worth 570 million dol'ars, A White Wyandotte hen in 1913 laid 303 White Wyandotte hen in 1913 laid 303 eggs, do not keep over 50 hens in one coop make the hens work, warm the corn, Keep clean wheat straw in the feeding department, kill the mite by using creosote kill big lice by greasing the hen with lard and coaloil.

The "Soy Bean as a future Crop," was discussed by C. B. McLain, plant in rows 28 inches apart drill in about 3 pecks per acre. Cultivate the same as corn, cut with mower and bunch.

as corn, cut with mower and bunch. In four or five days draw to barn, weeds hurt crop when broadcasted, plant June 10 to 15. Cut for seed the yield is 20 to 28 bushel; present method of thrashing not satisfactory, yield when cut for hay about 2 to 21-2 ton per acre, feeding value equal to alfalfa. A good catch crop when clover falls.

good one, look well to the location of the prospective farm, treat your fields so they won't get sick, have and tools, cast off the worn out machinery, do not plow up a field unless you are prepared to build it up, and ordinary fields nlow deep, nine inches is deep plowing one third of the fertility of this country is growing weeds, use the wind mill to clean small grain, do not pasture young clover, do not allow young clover, do not allow young clover, do not allow young clover to go to seed, clip it and let it lay as a mulch.

Ten ton of hay sold off the farm takes away \$70 worth of fertility, every-ton of clover hay is worth \$21 to the farm when properly used on the farm, you have no right to buy fertilizer unless you have used every kind produced upon the farm, E. Williams said he was getting \$1.34 for his corn by feeding it to hogs, Bradley Grover reports a home market of \$1.43 for corn and \$1.53 for wheat by feeding it to his hogs, buy manure if you can we should be willing to give the farm we should be willing to give the farm we should be willing to give the farm are young and clover; B. M. Shaffer said "Plowing deep on our yellow sand will ruin the land, Harsh said, "On the heavier soils plow deep.

Harsh, "Home making for the young people," give the boys and the girls the best room, make home a social center, mingle with the children, do not neglect the government in the home, children will be governed somewhere, begin when the child is young, begin in infancy, "Fathers and Mothers you can't grow your children withers you can't grow your children with-out the church, fathers take your wife to the city and show her around, brown stone homes curtain their troubles, learn to love your homes, be courteous

Ray Ames gave an impersonation,
Jacy and old Jacob, Mr. and Mrs. Geo.
Gorsuch sang a duet that was appreciated, Scott, Balanced rations for

If we are to have obedient children we must feed them a balanced ration the best crop is the boy and giru, mothers should understand the art of cooking and should know the feeding value of all foods, mothers should teach the girls home making.

Harsh—Corn Culture. Have you

This is a local question.

Use solid wheel planter on clay,

in about 4 days, use weeder and roller when corn is about 4 inches high. H. Gaschee spoke on the importance of selecting and caring for seed corn, urged selecting from standing corn, poor seed means failure, grow early

maturing variety for market under the Moisture test law.

D. W. *Williams gave a paper on, "How to grow 100 bushels of corn on one acre," this paper will appear in these columns later.
